

Hi!

Thank you for choosing the Infrastructure Setup Package!

To begin development, please send the following to luke@appsbyluke.com and schedule a kick-off meeting using [my calendar](#):

1. Platform Choice

- Preferred platform (AWS/GCP/Vercel/On-premise)
- Platform invitation for luke@appsbyluke.com (preferred way)
- Region preferences

Note: Access credentials can be shared securely using 1Password or your preferred password manager if platform invitation is not possible.

For SSH access when applicable:

```
ssh-ed25519 AAAAC3NzaC1lZDI1NTE5AAAAIJSIBWU/PPWA2x92wmDqX2NyHjmlYlN/V7bCEMUrU760 luke@logical-luke.com
```

2. Infrastructure Requirements

- Expected traffic volume
- Scaling requirements
- Backup requirements
- Monitoring preferences

3. Database Requirements

- Database type and version
- Initial capacity needs
- Backup frequency
- Performance requirements

4. Security Requirements

- Access control needs
- SSL certificate details
- IP whitelisting requirements
- Security monitoring preferences

5. Network Configuration

- Domain details
- DNS requirements
- Load balancing needs
- CDN requirements

Important Next Steps:

1. Send all the above requirements to luke@appsbyluke.com
2. Schedule a kick-off meeting using [my calendar](#)

Note: The delivery timeline will begin after the kick-off meeting is completed. This meeting is crucial for aligning expectations, clarifying requirements, and ensuring I have all necessary details to start.

If you purchased this service along with one of my app development packages (Core/Plus/Pro), I can cover both services in a single kick-off meeting.

Best regards,

Luke
